Dear Colleagues,
on behalf of the Austrian Society for Obesity and Metabolic Surgery it is my honor, privilege and pleasure to invite you to the **20th IFSO World Congress** to be held at the Hofburg Imperial Palace in Vienna, Austria, from **August 26th – 29th, 2015**.

We will continue in the tradition of the International Federation for the Surgery of Obesity and Metabolic Disorders to focus on the newly growing discipline of metabolic surgery, endolumenal and mini invasive approaches as well as the concept of team management. The role of metabolic surgery for the treatment of Type 2 Diabetes Mellitus, Metabolic Syndrome and its role in prevention of cardiovascular diseases will also be discussed in detail with the valuable contribution of researchers.

We will develop a scientific program of the highest standard covering global perspectives of this ever-evolving discipline that attends to our modern world epidemic that Obesity and Metabolic Disorders have come to represent.

Our distinguished keynote speakers and panelists will share their experiences and exchange ideas with the participants through postgraduate courses, lectures and round table discussions on bariatric and metabolic surgical techniques with the participants. We will also have courses and sessions encompassing basis of scientific research, medical writing and basic sciences for young bariatric surgery fellows and surgery residents.

The organizing Committee plans a green meeting which incorporates environmental considerations one aspect of sustainability that seeks to balance the social, environmental and economic concerns against business needs.

On behalf of IFSO and the Austrian Society for Obesity and Metabolic Surgery, the organizing team will welcome you to Vienna.

Welcome in Vienna 2015!

Karl Miller, MD, FACS
Congress President

Dear Colleagues,

It is my honor, privilege and pleasure to welcome all of you to the XX. World Congress of the International Federation for the Surgery of Obesity and metabolic disorders (IFSO) in Vienna, Austria.

My friend Karl Miller wrote his welcome address as a President of IFSO in 2011 for the XVI. World Congress held in Hamburg. Since this very successful meeting in Germany the obesity epidemic has been showing still an unrestrained increase. Surprisingly, developing countries are not spared.

Data from the WHO suggest that countries with a sedentary life style as well as those suffering from an evidently lower social status are showing a rapid flourish in the incidence of their morbidly obese citizens. This epidemic continuously pushes research institutes worldwide to find the optimal solution for this life-threatening state. However, surgery proved over the past decades to be the most effective solution, in terms of both weight loss and remission of obesity-associated debilitating diseases. Analysis of the currently existing data showed that by the start of the current decade, the yearly performance of bariatric procedures has been exceeding 300,000 procedures, performed by more than 8.000 surgeons worldwide. Long-term follow-up studies showed that the outcome of this type of surgeries exceeds and tends to be more durable compared to the conventional dietary and medical regimens.

The Federation IFSO is growing and 60 countries are joining IFSO at the moment. The membership of surgeons is increasing worldwide. By means of 10 permanent committees IFSO will support the work of the bariatric surgeons worldwide. It is time for new guidelines, which will not focus on weight and BMI only. The name 'BARIATRIC SURGERY' should be replaced by 'SURGERY for OBESITY and METABOLIC DISORDERS'. Obesity is a disease and should be treated seriously, like all others, and for diabetics in most need of METABOLIC SURGERY.

The Congress President, Karl Miller, and the Austrian Society for Surgery of Obesity and Metabolic Disorders, the IFSO Scientific Committee and the Program Committee have planned an excellent scientific program, containing all parts of our field, including Postgraduate Courses and Live-Surgeries.

Vienna is located in the heart of Europe and well-connected to the world, so we can expect a high number of attendees.

I look forward to meeting you in Vienna, a wonderful place to visit and discover.

Warmest regards

Prof. Dr.med. Rudolf A. Weiner

THE VENUE: HOFBURG IMPERIAL PALACE

The Hofburg Congress Center occupies a unique position among the congress centers of the world. The Hofburg Palace complex was built between the 13th and 20th century. The different wings of the former imperial residence portray the architectural periods of Renaissance, and Baroque up to Classicism. Until 1918 the Hofburg Palace was the seat of the Habsburg dynasty. The conference will be held today in the same hall where the Emperor held his audiences, gala dinners and royal balls, or where Empress Maria Theresia was baptized on May 15, 1717. Since 1958 the Hofburg Congress Center has been situated in parts of the Old Castle, New Castle and the Leopold Wing. The takeover of part of the Hofburg complex was a new starting point from which to carry on the continuity of this historic building.

WELCOME RECEPTION

The Welcome Reception will take place on **Wednesday, August 26th (18:30 – 20:00)** at the **HOFBURG IMPERIAL PALACE**. A typical “Viennese Welcome” with traditional snacks and drinks will be provided.

ROCK THE CONGRESS

Following the Welcome Reception on **Wednesday, August 26th** we ask the attendees to join us at the „PLATZHIRSCH“ for drinks, chat and dance at a get-together. Meet old friends and make new ones at a fancy Viennese Night Club.

The club is located in 5 minutes walking distance from the Imperial Palace. Tickets at the price of EURO 25 are available at the congress registration and after the welcome reception. A special welcome drink is included in the fee.

IFSO DINNER & VIENNESE BALL

A dinner reception upon invitation of the Mayor and Governor of Vienna will be held at the City Hall on **Friday, August 28th from 19:30 – 24:00**.

Tonight will incorporate the sights, sounds and most importantly feel of the **VIENNESE BALL** all into one evening. But the night won't stop there! Push the tables aside, change your shoes and we'll break out the dance floor for an after party with live music spinning to finish off the evening in style – all of this accompanied by world class Austrian inspired food and flavors with of course, local Viennese wines. This is an evening not to be missed.

ONE ANASTOMOSIS GASTRIC BYPASS (OAGB)

FORUM

Wednesday, August 26, 8:00-15:00

Course Directors and Moderators: Deitel M. (Canada), Prager G. (Austria), Chevallier JM. (France), Kular KS. (India), Chowbey P. (India)

08:00 Welcome: Why the OAGB/MGB is a good operation – Chowbey P. (Past-President of IFSO)

08:10 History and Rationale of the “Rutledge Operation”, and its names – Deitel M. (Founding & Honorary Life Member of IFSO)

STANDARD PROCEDURE: Moderator – Kular KS.

08:15 Video – Technique of MGB (from an 11-year personal series of >1,500 MGBs: data & long-term outcome) – Peraglie C. (USA)

08:35 Video – Step by step technique of OAGB/MGB – Tantia O. (India)

08:50 Q&A on Technique of OAGB/MGB – Panel: Peraglie C., Tantia O., Peters A NC. (India), Musella M. (Italy)

08:55 Complications of the OAGB/MGB (based on personal results of >1,500 cases) – Hargroder D. (USA)

09:05 Marginal ulcer after OAGB/MGB – Prevention and Treatment (based on an experience with >1,200 MGB patients) – Kular KS

09:15 A technique used for prevention of internal hernias after OAGB/MGB – Himpens J. (Belgium)

09:25 Metabolic Bone Disease (including iPTH): 10-year comparison of restrictive surgery, RYGB and MGB/OAGB: Prevention – Lee WJ. (Taiwan)

09:35 1. Treatment of steatorrhea and hypoalbuminemia after OAGB/MGB – 2. Revision to OAGB/MGB after primary restrictive operations. Apers J. (Belgium)

09:45 Panel discussion, Q&A – Lee WJ., Hargroder D., Jammu GS (India), Apers J., Ribeiro R. (Portugal), Forrig A. (Egypt): Management of hiatal hernia, H. pylori, post-op supplements, iron deficiency, excess weight loss with hypoalbuminemia, reversal or shorter limb revision, bile reflux.

09:55 Quality of life 5 years after OAGB/MGB – Chevallier JM.

10:03 OAGB/MGB in the super-obese – Peters A NC. (India)

10:11 Experience with OAGB/MGB in Italy – De Luca M. (Italy)

10:20 Survey of bariatric surgery in India – tailored bypass length, ease of reversal/revision, not obstructive so patients can eat healthy diet (high satisfaction score), fear of reflux and malnutrition – Prasad A. (India)

10:30 **Coffee Break – 20 minutes**

10:50 Is there any evidence for increased threat of cancer after MGB? (plus discussion of CA after other bariatric operations) – Deitel M.

ANTIREFLUX TECHNIQUE OF OAGB: Moderator – Prager G. (Austria)

- 11:00 Video – Technique of the Garcia-Caballero OAGB – Garcia-Caballero M. (Spain)
- 11:15 Tailored one-anastomosis gastric bypass: technical details and management of complications – revision surgery for OAGB with antireflux mechanism – Garcia-Caballero M. (Spain)
- 11:25 Changes in body composition in patients with BMI 23-50 after Tailored OAGB – influence of diabetes and metabolic syndrome – Garcia-Caballero M. (Spain)
- 11:35 Q&A on Garcia-Caballero method – Garcia-Caballero M. (Spain)
- 11:45 Hypoglycemia: is there a difference between RYGB and OAGB? – Prager G.
- 11:55 ANTIREFLUX OAGB (Carbajo method): 13-year results with >2,800 patients. Comparative results of OAGB, RYGB, gastric banding and sleeve gastrectomy – Carbajo MA (Spain)
- 12:10 OAGB as a revision for other bariatric operations – Carbajo MA., Luque de Leon E. (Mexico), Flores M. (Mexico).
- 12:20 The effect of OAGB on the diseases of the metabolic syndrome – Fonseca G. O. (Mexico)

12:30 –13:15 Lunch Break

RESOLUTION OF CO-MORBIDITIES: Moderator – Chowbey Pradeep

- 13:15 Efficacy of OAGB/MGB in type 2 diabetes resolution and in other co-morbidities – Musella M., Milone M. (Italy)
- 13:25 Long-term comparison of OAGB/MGB and RYGB (>10 years) and LSG – weight loss, complications, resolution of diabetes – Lee WJ. (Taiwan)
- 13:35 An audit comparing LSG, RYGB and OAGB/MGB – Jammu GS.
- 13:45 Greater weight loss with the omega-loop bypass compared to the RYGB: a comparative study – Maud R. (France)

TECHNIQUES & EFFECTS: Moderator – Chevallier JM.

- 13:55 The mechanism of the MGB and why weight loss is sustained – Also, Comparison of MGB and sleeve gastrectomy – Kular KS. (India)
- 14:05 Video – Revision surgery after OAGB/MGB – Chevallier JM. (France)
- 14:20 Ileal Food Diversion: a major modification of OAGB/MGB – results compared to BPD – Tacchino R. and Greco F. (Italy)
- 14:30 Robotic method of OAGB/MGB – Prasad A. (India)
- 14:40 Video – Robotic Technique of MGB with totally sutured anastomosis – Bhandari M. (India)
- 14:50 Technical comparison of two procedures (sleeve to OAGB/MGB or SADI) – Prasad A.
- 15:00 Adjourn

WRITING AND PUBLISHING A RESEARCH - ARTICLE OF EXCELLENCE (AOE)

ERZHERZOG KARL SAAL

Wednesday August 26, 8:00 – 15:45

Course Director: Buchwald Jane N. (USA)

- 08:00 Welcome
- 08:05 Why Write and Publish an Article of Excellence?
- 08:15 Limiting Bias: Modern Scientific Method
- 08:30 Aerial View of the Research Writing Process: The AOE RoadMap
- 08:40 Introduction: Function, Essential Content, Workflow
- 08:45 Introduction: Defining the Research Question in Scientific Context
- 09:05 Introduction: Electronic Literature Search, Journal Selection
- 09:30 Methods: Function, Essential Content, Workflow
- 09:35 Methods: Experimental and Observational Study Designs

10:00 – 10:30 Coffee Break

- 10:30 Methods: Selecting a Study Design
- 10:45 Methods: Five Key Interactions with the Statistician
- 11:00 Results: Function, Essential Content, Workflow
- 11:05 Results: Reporting Descriptive and Inferential Statistics
- 11:40 Questions & Discussion

12:00 – 13:00 Lunch Break

- 13:00 Results: Guidelines for Constructing Tables and Figures
- 13:10 Discussion: Function, Essential Content, Workflow
- 13:15 Discussion: Interpreting Results, Answering the Research Question
- 13:30 Discussion: Limitations and Conclusions
- 13:40 References: Anchoring the Study
- 13:50 Abstract and Title: Critical Synopses
- 14:00 Macro and Micro Editing and the Quality Audit
- 14:15 Research Writing Teams

14:25 – 14:40 Coffee Break

- 14:40 Ethics of Authorship and Funding Disclosure
- 14:55 Manuscript Submission
- 15:05 Succeeding in the Peer-Review Response Process
- 15:15 Principles of Scholarly Research Writing
- 15:20 The International Literature and Individual Researcher
- 15:30 – 15:45 Questions & Adjourn

BARIATRIC / METABOLIC SURGERY COMPLICATION MANAGEMENT

GARTEN SAAL

Wednesday, August 26, 8:00-15:00

Course Directors: Buchwald H. (USA), Nimeri A., MD (UAE)

08:00 Welcome and Introduction by Course Directors

SESSION I: HOW TO AVOID COMPLICATIONS IN BARIATRIC/METABOLIC SURGERY

Moderators: Shikora S. (USA), Nimeri A. (UAE)

08:10 Preoperative preparation of the new patient. – Shikora S. (USA)

08:20 Preoperative preparation of the patient for revisional surgery. – Cohen R. (Brazil)

08:30 Preoperative preparation of the patient with an acute complication. – Torres A. (Spain)

08:40 Postoperative complication can be prevented intraoperatively. – Buchwald H. (USA)

08:50 Panel discussion

**SESSION II: MANAGEMENT OF TECHNICAL COMPLICATIONS
AND PROBLEMS IN BARIATRIC/METABOLIC SURGERY**

Moderators: Weiner R. (Germany), Angrisani L. (Italy), Bukhari K. (KSA)

09:10 Management of leaks. – Rosenthal R. (USA)

09:20 Management algorithm for post sleeve gastrectomy leak. – Nimeri A. (UAE)

09:30 Management of bleeding. – Miller K. (Austria)

09:40 Management of stenoses. – Weiner R. (Germany)

09:50 Management of bowel obstruction, internal hernias. – Angrisani L. (Italy)

10:00 Management of anastomotic and gastric remnant ulcers. – Melissas J. (Greece)

10:10 Management of gallstones and CBD stones. – Agrawal S. (England)

10:20 Management of fistulas. – Fobi MAL (USA)

10:30 Panel discussion

10:50 Coffee & Refreshment Break

SESSION III: MANAGEMENT OF METABOLIC COMPLICATIONS

Moderators: H. Buchwald (USA), W. Pories (USA), N. Scopinaro (Italy)

11:10 Post gastric bypass hypoglycemia. – Pories W. (USA)

11:20 Undiagnosed abdominal pain syndrome. – Fiennes A. (England)

11:30 Bile reflux gastritis after Omega loop gastric bypass. – Dixon J. (Australia)

11:40 GERD after sleeve gastrectomy. – Bukhari K. (KSA)

11:50 Postoperative malnutrition. – Scopinaro N. (Italy)

12:00 Postoperative diet and supplements. – Badiuddin F. (UAE)

12:10 Panel discussion

12:30 Lunch Break

SESSION IV: MANAGEMENT OF WEIGHT RECIDIVISM AFTER BARIATRIC/METABOLIC SURGERY

Moderators: R. Rosenthal (USA), M. Lakdawala (India), N. Zundel (USA)

- 13:30 Selection of patients for revisional surgery. – Zundel N. (USA)
- 13:40 Management of failed gastric banding. – Lakdawala M. (India)
- 13:50 Management of failed vertical banded gastroplasty and gastric imbrication. – Fried M. (Czech Republic)
- 14:00 Management of failed gastric bypass and Omega bypass. – Gawdat K. (Egypt)
- 14:10 Management of failed sleeve gastrectomy. – Gagner M. (Canada)
- 14:20 Management of failed biliopancreatic diversion/duodenal switch. – Baltasar A (Spain)
- 14:30 Special Lecture: Minimizing readmissions: The ACS DROP Program. – Morton J. (USA)
- 14:40 Panel discussion
- 15:00 Closing remarks by the Course Directors

BARIATRIC / METABOLIC GASTRIC PPLICATION

SCHATZKAMMER

Wednesday, August 26, 08:30 – 15:30

Course Directors and Moderators: Fried M. (Czech Rep.), Copaescu C. (Romania),
Dolezalova K. (Czech Rep.)

Tentative Faculty: Brethauer S. (USA), Rogula T. (USA), Karmali S. (Canada),
Galvao M. / Ramos A. (Brazil)

08:30 Introduction of the Course, Fried M.
Gastric plication history, WWW literature review, Important things to consider before starting gastric plication. – S. Brethauer (USA), T. Rogula (USA)

Tips and tricks - operation technique - Gastric plication complications prevention and management – Dolezalova K. (Czech R.)

Gastric plication results from high volume Center in Mexico - lessons learned – Lagardere AO. (Mexico)

10:00 Coffee Break

10:30 Metabolic effects, hormonal/incretin changes after gastric plication, Gastric plication as a conversion procedure (banding to plication, sleeve to plication, replication) – Fried M. (Czech R.)

Gastric plication – Long-term results. – Talebpour A. (Iran)

11:00 Lunch Break

12:30 When to revise and/or convert a gastric plication, and with which procedure? Copaescu (Romania) C.

Canadian experience with gastric plication – results. – Karmali S. (Canada)

13:30 Coffee Break

15:00 Endoluminal plication / bariatric procedures – M. Galvao, A. Ramos (Brazil)

15:30 Round table discussion and wrap-up: all the speakers

ANIMAL LAB (ANASTOMOSIS, SILS, HEMOSTASEOLOGY)

VIENNA I ANIMAL LAB

Wednesday, August 26, 9:00 – 14:00

Workshop Directors: Beckerhinn P. (Austria), Higa K. (USA) Prager G. (Austria)

Tutor: Jonas P. (Austria) Langer F. (Austria)

COURSE OVERVIEW AND TARGETS:

The "Hemostasis and Stapling" Workshop will provide trainees with a hands-on possibility to experience different methods of hemostasis on one hand and performing stapled resections and anastomoses on living animal tissue in the pig lab on the other.

COURSE OBJECTIVES

1. Preparation
Dissection of the omentum using the Harmonic Scalpel
2. Stapling of anastomoses
Experience the handling of linear stapling devices by performing resections of the stomach as well as linear anastomoses between small bowel segments
3. Suturing
Closing the enterostomy by performing laproscopic stitches
Hand sewn anastomotic technique
4. Hemostasis
Bleedings of liver and spleen will be managed using the different hemostatic devices

Online Registration mandatory: www.IFSO.com

PROGRAM:

- 08:45 Arrival at Baxter Animal Lab
- 09:00 Introduction to the pig anatomy
- 09:15 Product information (Surgiflo, Peristrip, Duplo MIS) supported by Ethicon & Gore (Koller K., Sales Manager, BioSurgery)
- 09:30 Product information stapling devices (supported by Covidien & Ethicon)
- 10:00 Training in the Animal lab
- 14:00 Closing remarks and hand-out of certificates

Snacks and drinks will be provided during training breaks

BARIATRIC ENDOSCOPY

PRINZ EUGEN SAAL

Wednesday, August 26, 07:30 – 18:00

This course will allow participants to use basic and advanced endoscopic tools that are critical to performing diagnostic and interventional endoscopy in bariatric patients.

Course Directors and Moderators: Galvao M., Gastro Obeso Center Sao Paulo (Brazil)
Zundel N., Florida International University (USA)

Tentative Faculty: Abu Dayyeh B., USA, Josemberg Campos, Brazil, Costamagna G., Italy, Dib R., Brazil, Escalona A., Chile, Greco E., Brazil, Goustot J.C., USA, Higa K., USA, Lopez-Nava G., Spain, Caetano Marchesini J., Brazil, Pena N., Dominican Republic, Peretta S., France, Ramos A., Brazil, Turro R., Spain, Stier C., Germany, Miller K., Austria, Pujol J., Spain

TENTATIVE PROGRAM

07:30 – 08:00 Welcome and accommodation

BE FOR SURGICAL COMPLICATIONS MODULE

08:00 – 08:15 Course introduction and highlights – Zundel N. and Galvao Neto M.

08:15 – 08:30 BE overview

Bariatric endoscopy anatomy – Surgical X endoscopic perspective. – Galvao Neto M.

GASTRIC BAND BE

08:30 – 08:45 Surgical treatment of gastric band complications. Emphasis on band erosion. – Zundel N.

08:45 – 09:00 Endoscopic treatment of band erosion and the interface with its other complications – technical aspects and results. – Galvao Neto M.

09:00 – 09:10 Interaction / Questions

RYGB BE

09:10 – 09:30 Surgical treatment of RYGB complications. – Ramos A.

09:30 – 10:00 Endoscopic treatment of RYGB complications. – Caetano Marchesini J.

10:00 – 10:10 Interaction / Questions

SLEEVE GASTRECTOMY BE

10:10 – 10:30 Sleeve Gastrectomy complications – “Surgeon perspective”. –Szmstein S.

10:30 – 11:00 Sleeve Gastrectomy complications – Endoscopic treatment. – Campos J.

11:00 – 11:10 Interaction / Questions

11:10 – 11:30 **Coffee Break**

Bariatric endoscopy live procedures module 11:30 – 15:00

Procedures broadcast to Montreal to view and interact—Lunch box during session

Endoscopic sleeve gastropasty – Abu Dayyeh B. and Goustot J.C. (USA)

RYGB endoscopic revision – Costamagna G. (Italy)

POSE procedure – Turró R., Barcelona (Spain)

Endolumenal duodeno-jejunal bypass – Pujol J. (Spain)

Intragastric Balloon implants and explant - Campos J., Greco E. and Dib R. bariatric Endoscopy team (Brazil)

Endoscopic treatment of bariatric surgery complications – Gastric band and RYGB ring erosions, RYGB and sleeve gastrectomy leaks and stenosis - Campos J., Grecco E. and Dib R. bariatric Endoscopy team (Brazil)

BE as obesity treatment and BS on weight loss failure module 15:00 to 18:00

15:00 – 16:10 Endoscopy treatment of obesity and metabolic comorbidities

15:00 – 15:15 What to expect from BE as a primary treatment option for obesity.
Present and future perspectives. – Peretta S. (Spain)

15:15 – 15:30 Intragastric balloons as space occupying devices. Overview and results –
Lopez-Nava G.

15:30 – 15:45 Endoscopic endolumenal gastropasty. – Pena N.

15:45 – 16:00 Endoscopic endolumenal fundus gastropasty, technical issues – Miller K.

16:00 – 16:15 Endoscopic endolumenal bowel diversions – Escalona A.

16:15 – 16:30 Endoscopic endolumenal tissue remodelling – Galvao Neto, M. (Brazil)

16:30 – 16:45 Evidence base analysis of Endoscopic treatment of obesity and diabetes –
Stier C. (Germany)

16:45 – 17:00 Interaction / Questions

Endoscopy treatment on weight loss failure post bariatric surgery

17:00 – 17:15 Defining post-top weight loss failure. – Higa K. (USA)

17:15 – 17:30 RYGB endoscopic revisions besides endoscopic suturing – Pena N.

17:30 – 17:45 RYGB endoscopic revision with endolumenal suturing. – Galvao Neto M. (Brazil)

17:45 – 18:00 Interaction / Questions

DIFFICULT AIRWAY HANDS-ON WORKSHOP

GARTEN SAAL

Saturday, August 29, 08:30 –12:30

Course Directors and Moderators: Daniela Godoroja (Romania), J. Brodsky (USA)

Faculty: Luc de Baerdermaeker (Belgium), Christian Byhahn (Germany), Günther Frank (Austria), Tomasz Gaszynski (Poland), Sunita Goel (India), Barbara Kabon (Austria), Mike Margaron (United Kingdom), Jan Mulier (Belgium), Claire Nightingale (United Kingdom), Elisabeth Roth (Austria), Euan Shearer (United Kingdom), Ashish Sinha (USA)

Course Overview and Target Audience

The Difficult Airway Workshop will provide anaesthetists and interested surgeons with an overview of current concepts and devices available in the management of airway emergencies and review the algorithms and recognized pathways for dealing with complex airway management.

The session focus will be airway management in the obese patient

Course Objectives

Upon completion of this activity, participants will improve their practice in the following high risk areas:

1. Difficult airway and awake intubation

- When and how to perform a stress-free awake intubation using videolaryngoscopes or flexible fiberscopes
- Identify indications, contraindications, complications, and most appropriate techniques used in local anesthesia for the airway in anticipation of awake airway management

2. Videolaryngoscopy

- Review the different Videolaryngoscope devices and techniques and their role in Morbidly Obese Intubation in accordance with ASA and DAS algorithms

3. Flexible fiberscope use

- Identify the correct situations for the use of flexible fiberoptic or fiberoptic-like intubating scopes, including the indications, contraindications, and complications.
- Develop skills including insertion of fiberscopes into mannequins to recognize intraoral, intranasal, and tracheal anatomy.
- Identify indications, contraindications, complications, and appropriate techniques used in local anesthesia for the airway in anticipation of awake airway management.
- Develop a combination strategy for a failed airway technique. Use of a rigid laryngoscope to open a path for a fiberscope; use of a fibrescope in combination with supraglottic airways and intubating SGA, videolaryngoscopes, ETT exchange.

4. Safe extubation and the airway exchange catheter

- When and how to use airway exchange catheters and when not to use them.

5. Lung isolation

- learn and practice lung separation techniques in airway simulators
- left and right double lumen tube placement with confirmation of placement and troubleshooting
- use of bronchial blockers and options for lung separation in the face of difficult airways.

6. Ultrasonography for clinical decision-making and intervention in airway management.

- identify predictors for airway difficulty during induction of anaesthesia,
- evaluate the aspiration risk (stomach gastric content)
- identify the cricothyroid membrane and tracheal rings: confirm tracheal or oesophageal intubation
- perform nerve blocks for awake intubation
- emergency diagnosis of pneumothorax for thoracocentesis
- diagnosis lung consolidation, atelectasis, pleural effusion

7. Failed airway and open cricothyroidotomy

- Review the indications for emergency surgical airway management in relation to the recognised difficult airway algorithms.
- Describe the differences between elective tracheostomy and emergency surgical cricothyroidotomy in airway management.
- List and characterize the various forms of emergency surgical airway, including transtracheal jet ventilation and insertion of an endotracheal tube through a cricothyroidotomy;
- Identify and describe the anatomical landmarks for carrying out a needle or surgical cricothyroidotomy and perform these techniques on porcine models
- Understand difficulties and identify complications of these techniques in morbidly obese patient

APOLLO ENDOSURGERY, INC. is revolutionizing the treatment of obesity and other gastrointestinal disorders by developing less invasive solutions for a whole new group of patients not seeking treatment today. Apollo is a global innovator pushing boundaries to bring new technologies and innovative products to markets in over 80 countries today.

ARTHREX has been improving surgical techniques in orthopaedics and traumatology since 1981. With over 6,000 developed products, Arthrex stands for innovation and quality in the field of arthroscopy, sports medicine and orthopaedics. Working with renowned orthopaedists and surgeons, solutions are continuously developed and improved to make even complex procedures evermore simple and safe.

Europe's first specialized full-range bariatric supplier of equipment and furnishings for hospitals, rehab facilities, doctor's practices, retirement and nursing homes and at home. ASCURO, with its brands adicare® and SimplyBig®, offers special knowledge and the right products for an appropriate bariatric care at affordable prices.

ASMBS, founded in 1983, is the world's largest national nonprofit medical organization dedicated to metabolic and bariatric surgery. With more than 4300 members in over 20 countries, the society strives to improve public health by lessening the burden of obesity and obesity-related diseases worldwide.

BARIATRIC SOLUTIONS manufactures a complete range of bariatric products: the MiniMizer gastric band, the MiniMizer Ring for banded gastric bypass and banded sleeve gastrectomy. Next to that we produce a new generation of Goldfinger, called the Pinky Trigger.

The DACH MEDICAL GROUP HOLDING AG is a medical device distribution company, dedicated to the distribution of medical devices in the markets of Germany, Austria and Switzerland. One of our focus areas is bariatric surgery. DACH Medical Group maintains offices, warehousing, customer service and sales operations in each of the three countries.

GI DYNAMICS is the developer of EndoBarrier®, the first endoscopically-delivered device therapy designed to mimic the mechanisms of metabolic surgery, without altering the anatomy. Through its EndoBarrier® Therapy, GI Dynamics is poised to address the growing diabetes and obesity patient populations.

From creating the first sutures, to revolutionizing surgery with minimally invasive procedures, ETHICON has made significant contributions to surgery for more than 60 years. Our continuing dedication to *Shape the Future of Surgery* is built on our commitment to help address the world's most pressing health care issues, and improve and save more lives. Through Ethicon's surgical technologies and solutions including sutures, staplers, energy devices, trocars and hemostats and our commitment to treat serious medical conditions like obesity and cancer worldwide, we deliver innovation to make a life-changing impact. The INTERNATIONAL FEDERATION FOR THE SURGERY OF OBESITY AND METABOLIC DISORDERS (IFSO) is a federation composed of national associations of bariatric surgeons, bringing together surgeons and allied health professionals, involved in the treatment of morbidly obese patients. 60 national societies for the surgery of obesity are members of IFSO.

KARL STORZ is one of the world's leading suppliers of endoscopes and endoscopic equipment for all fields of application. The German family-owned company with its 5,800 employees in 50 subsidiaries has evolved into a manufacturer known and appreciated worldwide for its quality and product innovations.

Closed Joint-Stock Company MEDSIL (founded in 1992) is a Russian manufacturer of intragastric balloons, sets of endoscopic instruments for intragastric balloon removal, adjustable gastric bands, and silicone calibration tubes of different sizes (30-45F) for sleeve gastrectomy.

METAGENICS is a leading company in the development, manufacturing and distribution of nutrients for health professionals. Metagenics works together with doctors, pharmacists and professional healthcare providers to improve the lives of their patients. Our products form an important addition to the therapeutic arsenal to fight nutritional deficiencies or chronic diseases. Bariatric Advantage is designed specifically to meet the needs of bariatric patients. Metagenics Europe is headquartered in Ostend, Belgium.

TIANJIN ONE HEALTH MEDICAL INSTRUMENTS CO., LTD is specialized in development and manufacture of surgical instruments. Among our products there are surgical staplers for open and laparoscopic procedures and other minimal invasive accessories. At the present time we are working on the development of energy products line.

THE GORE MEDICAL PRODUCTS DIVISION has provided creative therapeutic solutions to complex medical problems for more than 35 years. During that time, more than 35 million innovative Gore Medical Devices have been implanted, saving and improving the quality of lives worldwide. The extensive Gore Medical family of products includes vascular grafts, endovascular and interventional devices, surgical meshes for hernia repair, soft tissue reconstruction, staple line reinforcement and sutures for use in vascular, cardiac, and general surgery. Gore is one of a select few companies to appear on all of the U.S. "100 Best Companies to Work For" lists since the rankings debuted in 1984.
