## **Downloadable Scientific Program Brochure Available for the 2<sup>nd</sup> World Congress on Interventional Therapies for Type 2 Diabetes**

The Program Committee has released an [OUTSTANDING scientific program](#) for the plenary sessions of the World Congress. The program of the interactive clinical and research breakout sessions will be announced shortly.

### **[Download the Scientific Program Brochure](#)**

At the World Congress the **International Diabetes Federation (IDF)** will publicly announce its newly developed [Position Statement on surgical and interventional treatments for type 2 diabetes](#) in a dedicated session on the morning of Monday, March 28<sup>th</sup>.

The program will provide comprehensive coverage of all aspects of diabetes surgery and novel GI interventions, including indications for surgical treatment and choice of procedure, peri-operative management, cardiovascular risk reduction, novel device-based approaches to diabetes, mechanisms of action of surgery, priorities for clinical trials, cost effectiveness of diabetes surgery, and implications for public and private health insurance.

When making travel arrangements, **BE SURE TO ATTEND Wednesday's EXTRAORDINARY SESSIONS: A MUST SEE!!**

**On Wednesday March 30<sup>th</sup>, the Congress will culminate with:**

- Keynote Lecture by 1985 Nobel Prize Winners for Medicine/Physiology Drs. Mike Brown and Joe Goldstein.
- An all-star group of some of the world's most authoritative scientists and clinicians will examine the provocative hypothesis that the GI tract may play a role in the pathogenesis of diabetes and obesity.
- Summary/take home messages on clinical practice, policies, and research priorities will be developed in real-time and presented by a dedicated group of world authorities in the field of diabetes and metabolic surgery.
