

4th international ESPCOP Meeting

Bruges Belgium, 14th December 2013

Dear Colleague,

I would like to draw your attention to the fourth scientific meeting of the ESPCOP taking place in Bruges on 14th of December 2013 focused on anesthesia for the morbidly obese patient.

International speakers shall discuss common problems in anesthesia and obesity and give practical advice. See the enclosed program on how and why to handle some of the problems listed below:

Ventilation, lung recruitment, atelectasis prevention, respiratory depression – stimulation, obstructive breathing, STOP-BANG questionnaire, opioid dosing, opioid sparing and opioid free, epidural analgesia, laparoscopic workspace troubles.

As member of ESPCOP (50 euro for anesthesiologists and 30 euro for a trainee or nurse) you will receive a 50 (30) euro reduction.

Enclosed is the form to make you member at the same time. Please fill in and sent to nathalie.anquez@azsintjan.be or kelly.baert@azsintjan.be

Payment by bank transfer to account number BE09 3800 1841 8957 – BIC BBRUBEBB of ESPCOP Anesthesie.

Reference: Membership + your name.

4th ESPCOP meeting

December 14th 2013
Crown Plaza, Burg 10
Bruges, Belgium.

Registration starts at 8 a.m.
Program: 9 a.m. – 6 p.m.

Does Anaesthetic technique affect outcome in the morbidly obese patient? This meeting addresses many aspects of peri-operative care for the obese patients, and amongst these will be particular focus on atelectasis, opioids, NMB and epidurals. Each lecture will discuss pathophysiology and the practical consequences for us in our daily clinical work.

The preliminary program and speakers:

What is new in the ventilation of the morbidly obese patient?

Paolo Pelosi

Haemodynamic effects of lung recruitment in the morbidly obese patient.

Tomasz Gaszynski

New practical tools to prevent peri-operative atelectasis in the morbidly obese patient.

Jan Paul Mulier

Is there a place for respiratory stimulants in anaesthesia for the obese patient?

Luc De Baerdemaeker

The impact of obesity on outcome in general ICU. The ICNARC study

Michael Margaron

Variability and failings in the care for patients undergoing bariatric surgery, The NCEPOD Bariatric Surgery study.

Euan Shearer

Opioid sensitivity and respiratory depression. Practical approaches to aid peri-operative opioid dosing strategies.

Michael Margaron

The STOP-Bang questionnaire: What it is and how to use it.

Frances Chung

Does obstructive sleep apnea increase the rate of postoperative complications and can we avoid this?

Frances Chung

Advantages and challenges of opioid-free anaesthesia in the morbidly obese patient?

Marc Dekock

Using an opioid-free anaesthesia protocol for bariatric surgery: Practical application.

Jan Paul Mulier

How to improve the quality of Obstetric Anaesthesia for the morbidly obese parturient.

Yigal Leykin

Practical aspects of epidural analgesia in obese patients. Do we need ultrasound and are long needles safe in morbidly obese parturients?

Marcel Vercauteren

What I do as a bariatric surgeon when I do not have enough laparoscopic workspace.

Bruno Dillemans

Update on muscle relaxant dosing requirements in morbid obese patients to achieve deep NMB.

Yigal Leykin

Is Post-operative Residual Curarisation a significant problem in the morbid obese patient? How can we deal with it?

Tomasz Gaszynski

Registration by payment of 150 euro to account of ESPCOP
Nurses and trainees: 30 euro
Members of ESPCOP: 100 euro
After November 1st 2013: 180 euro
For international transfer:
BIC: BBRUBEBB
IBAN: BE09 3800 1841 8957

Abstracts related to obesity and anaesthesia or intensive care presented for the first time within the last year may be submitted for our scientific session. All selected abstracts will be presented as posters, and the best four or five will be selected for oral presentation. There will be prizes of 250, 500 and 1000 euro for the three best presentations.

4th international ESPCOP Meeting

Bruges Belgium, 14th December 2013
