One Covidien for Bariatrics

SICOB Napoli - Simposio Satellite Covidien
15th May 2014 • h. 13.30 - 15.00
Grand Hotel Santa Lucia - Sala "Capri" • Via Partenope, 46

The surgery of obesity and its complications are growing fast.

This year in conjunction and before its national annual meeting, the Italian Society for the Surgery of Obesity and metabolic disorder (S.I.C.O.B.) will host, in Naples, an International Live Surgery Meeting. Leading surgeons from all over the world will perform at the "Federico II" University Hospital the most advanced laparoscopic techniques currently used for primary and revision operations which will be broadcast in the plenary auditorium for an interactive session, stimulated by international renowned Chairmen and Moderators. But surgery is a discipline in a continuous phase of evolution and transformation. Trans-oral endoscopic techniques are constantly being proposed to replace laparoscopic access.

Therefore traditional and new endoluminal techniques will be also performed live. Who will be the actors? Endoscopic Gastroenterologists or Endoscopic Surgeons or team approach: this will be another raising point of controversy. Single incision techniques and devices will be performed and discussed too. Robotic assisted procedures: are these the best ones? Work is in progress, the scenario is classic: the volcano "Vesuvius", the blue see and the medieval castle.

Welcome to the bay of Naples for 2 very exciting days!
