

IDMSS International Diabetesity and Metabolic Surgery Summit

SAVE THE DATE

Tel Aviv, Israel, November 28-30, 2018

Call for Abstracts is Open

OUR SUMMIT AIMS TO:

- Increase the international knowledge of bariatric surgical procedures
- Stimulate the investigation & development of new and more effective treatments
- Bring together world experts in the fields of metabolic surgery and medicine

Once considered afflictions of the developed world, Diabetes and Obesity have become twin endemics throughout the world and across all cultures and economic conditions. At present, bariatric (weight loss) surgery has been demonstrated to be the most effective treatment option that can dramatically improve both metabolic disorders as well as several other metabolic diseases.

Join us in the beautiful city of Tel Aviv for this unique event to include didactic state-of-the-art presentations, debates, panel discussions, and a best paper presentation contest on the following topics:

- Diabetesity Epidemic
- Internist Perspective on Metabolic Surgery
- Metabolic Bariatric Surgery
- Controversies in Metabolic Surgery
- Metabolic Relapse
- Debate: Which procedure is superior
- Endoscopic Procedures
- Complications of Metabolic Surgery
- Future Directions for Metabolic Surgery

The range and scope of the program are a must for all clinicians caring for patients suffering from metabolic diseases!
